### ***Election Requirement***

This application contains claims directed to the following patentably distinct species of the claimed invention: Method / composition comprising numerous nuclear receptor compounds and a nuclear receptor enhancing compounds.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, a method / composition comprising a nuclear receptor compound of formulas I - VI and a nuclear receptor enhancing compound is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission

Art Unit:

may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

During a telephone conversation with Attorney P. Docherty on 2/18/02 a provisional election was made with traverse to prosecute the invention of a composition comprising a compound of formula I plus orthovanadate, claims 1-23. Affirmation of this election must be made by applicant in replying to this Office action. Composition / method comprising all other nuclear receptor compounds and nuclear receptor enhancing compounds are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

***Claim Objection under 37 CFR 1.75( c)***

Claims 22 and 23 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 22 and 23 are method claims and claim 21 from which claims 22 and 23 depend is a composition claim. Correction is required.

***Claim rejection under 35 U.S.C. 112, 2nd paragraph***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit:

2. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: related to what object is the instant composition being applied to.

***Claim Rejection under 35 U.S.C. 102(b)***

The elected composition is not suggested by the prior art. Therefore, the search was extended beyond the election.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Clark (US 4945089; 7/31/90).

Clark discloses a composition comprising tetrahydrocortexolone (steroid compound of formula I - nuclear receptor ligand) and a glucocorticoid (nuclear receptor enhancing compound). See abstract, column 2 line 29 - column 3 line 55.
